CARMANGAY HAVE
SUCCESSFUL ICE
CARNIVAL

The weather was ideal for the ice carnival staged by the Carmangay Hockey Club on Thursday evening last when there was a good crowd from Barons, Champion, and surrounding districts. Besides the racing and skating entries, a round robin series of hockey was played which received enthusiastic interest.

Champion and Carmangay crossed sticks for the first period, the former team winning 3-1. In the second period Champion went down to defeat against Yetwood in a score of 1-0. In the third period Yetwood won over Carmangay by a score of 3-0, making Yetwood the winner of the series with 4 goals. A novelty game played with hockey sticks and a football, concluded the evening's program.

The senior C. G. I. T. group served lunches during the evening from a booth set up in one of the dressing rooms.

Racher-Olson

Miss Esther Marie Olson, of Staveland, and Robert Glenn Racher, of Champion, were married at the United church house in Norton, Friday, January 7th. Rev. C. S. Pinder officiating. Miss Ruth Olson, of Staveland, acted as bridesmaid, and Edmund Ollivier, of Champion, supported the groom.

VILLAGE COUNCIL MEETING

A regular meeting of the Council of the Village was held in the Secretary's office on January 12th, with C. McLean, J. D. Henderson and F. W. Clever present.

Minutes of the regular and special meeting were read and adopted.

G. K. McLean was appointed returning officer for the village and J. D. Henderson as deputy-mayor for the next ensuing three months.

The Secretary was directed to immediately take steps to have distress warrants placed on various properties within the village of f Champion, for the purpose of receiving rent monies for payment of outstanding taxes due the village.

LOCALS

Mrs. I. Fisher entertained the Girl Guides and their leader, Mrs. J. Walker, on Tuesday evening. Games were played and delicious refreshments served.

Word was recently received in town that C. A. Johnson of Lovelland, Texas, was severely burned about the hands and face when the bath house in the oil field blew up. Mr. Johnson was immediately rushed to a hospital and the seriousness of his burns necessitated him staying there for several days.

Mr. Johnson was employed by the Hudson Bay Oil Co. when they were operating in Alberta, and is well known in the Champion district.

Church of England Service will be held in the Community Hall, Champion, on the 23rd of January at 2 p. m., followed by the annual meeting. It will be necessary to elect a Delegate to the Synod at this meeting, for the Parish of Emmanuel Church.

K. R. McLean, Sight Special

ist, 210 Southern Bldg., Calgary, will be in Carmangay at the Drug Store Tuesday morning, Jan. 25, and in Champion at the Drug Store Tuesday afternoon

LOCALS

Mrs. C. G. Taylor was a Lethbridge visitor Saturday.

Mrs. R. Tyler has been advised by her physician, Dr. Freeze, that she must take a complete rest in bed for the next couple of months.

Mr. and Mrs. Bert Bailey of Fairview, Alta., en route home from an extended tour of Michigan and Western States, were visitors at the home of Mr. and Mrs. F. Clever on Wednesday.

Mrs. G. L. Dopus and Mrs. W. A. McIntyre were joint hostesses at the home of the former on Friday evening, when they entertained at four tables of bridge. Honors were shared by Mrs. J. Walker and Mrs. E. H. Freeze, while the consolation was won by Mrs. R. S. Bond.

Word was received on Saturday by Mrs. C. Williamson that her daughter, Miss Ada Williamson, nurse-in training at the Royal Jubilee Hospital at Victoria, B. C., had been successful in her recent examinations and had received her cap.

The A. Y. P. A. held their regular meeting last Monday evening. After a short business session, the balance of the evening was devoted to games and dancing, with refreshments served by the committee in charge.

Nels Running, who was confined to his bed the beginning of the week is now able to be up around again. During his absence D. Chamberlin is substituting on the staff of the Savoy hotel.

LOCALS

Don. Campbell was a Calgary visitor, Monday.

Jimmy Anderson, who is confined to his home with the measles is progressing favorably.

Bob Tyler was taken to the Carmangay hospital on Tuesday where he will receive treatment for a week or two.

Mr. and Mrs. A. W. Jopling were Lethbridge visitors on Saturday.

Miss Marlene Dobbs of Vulcan was a recent visitor at the home of Mr. and Mrs. H. T. Lamont.

Mrs. C. McLean had as her dinner guests on Sunday, Mr. and Mrs. Becker and Miss Elsie McLean of Nobleford.

Barney Hummel, who is giving instructions in black and white at the Technical school in Calgary, was a week and visitor at his home.

Mr. and Mrs. Geo. Orr, accompanied by Mr. and Mrs. G. M. Campbell and Mr. and Mrs. W. A. McIntyre motored to Turner Valley on Sunday.

Mr. and Mrs. John Moss of Phillips, Texas are receiving congratulations on the birth of a daughter, Dorene Adelle, on Thursday, January 13th. Mrs. Moss was formerly Miss Irma Johnson.

The students of the High School are holding a dance in cabaret style in the Community hall on Friday, January 28th, when ex-high school students will be invited. A feature of the evening will be a floor show by the High School.

LOCAL TEACHERS ELECT OFFICERS

A meeting of the teachers of the Champion Cons. School and district was held in the school on Jan. 15. A sub-local of the Alberta Teachers' Alliance was organized. The following officers were elected:

Miss Helen Helm - President.
Mr. V. Wellman - Vice Pres.
Miss Aileen McCulloch - Sec. Treas.
The next meeting will be held Tuesday, January 25th, at 8 o'clock in the Champion School. This meeting will take the form of a social. All teachers are cordially invited to attend.

The January meeting of the Ladies' Aid will be held at the home of Mrs. McIntyre on Jan. 27th. A good attendance is requested.

Federal Social Credit Members Address Local Audience

Champion Community Hall was filled to capacity last night to hear J. H. Blackmore M. P. and Rev. E. G. Hansell M. P. speak on a Monetary Reform. Chairman Al Miller, Zone president, after the singing of "O Canada", called on Mr. Hansell to address the gathering. He said that all were uniting to put over a new system which would solve the problem of Monetary Reform. Power over our own finances was necessary, not in the hands of a chosen few, but for the people. Under the present system money issued by the banks was "debt money" what we need is "debt free money". Interest means just that much more borrowed money. The speaker referred to the much discussed topic of Religion and Politics and could not see how they could very well be separated as all food and clothing was provided by a bountiful Creator. It was the bounden duty of man to devise the means of production and distribution. Mr. Hansell, continuing, said that he and his colleagues would soon be going back to Ottawa stronger than ever in the belief that theirs was a righteous cause which had the welfare of the people at heart.

J. H. Blackmore, M. P. addressed the audience for approximately two hours while he pointed out some of the flaws in the present system and quoted many passages from the writings of eminent Economists which showed the necessity of the State creating the money and giving it to the people. He referred to the depression that was now being experienced in the States, and the way President Roosevelt was trying to cope with it. Mr. Blackmore drew a somewhat gloomy picture of the future when he gave figures showing the drop in earning power of workmen year by year caused by the ever-increasing labor-saving machinery used, and the consequent withdrawal of purchasing power resulting. Mr. Blackmore stated that a new system was the only hope of a dying civilization and believed that we were on the right track and must keep on trying in spite of strong opposition from the controllers of the present system. The question of a bank of Alberta was dealt with and the reason it was not desirable. The question of the dividend was also brought up and Mr. Blackmore pointed out that the legislation providing for this

was now being held up in the Courts. Mr. Blackmore made some caustic comments on the actions of the U. P. A. leader and his lack of understanding of Control of Credit.

NEW MACHINERY FOR ALBERTA ROADS

Purchase of the latest road rolling equipment is likely to be made by the Alberta government this year in carrying on its proposed 400 mile surfacing program.

The minister of public works, Hon. W. A. Fallow, is inspecting types of this equipment while on a visit to Chicago and St. Paul.

Some time ago it was reported that the province may purchase \$200,000 worth of new road machinery this year. Last year two oiling machines were purchased, but on account of the improvements in equipment which have been made since that time, it is likely that these machines will be turned in on the purchase of four five of the most modern type available for this year's operations.

Oiling of the highways forms the first course of hard surfacing, which has long been advocated by the Alberta Motor Association and other organizations.

Experience has shown that the oiling or blotter treatment must be followed up by the second course or seal coat, giving a finished hard surfaced highway, which is what tourists demand these days. This also is the type of road that provides pleasant driving for Alberta residents.

The weather man apparently has not decided what kind of weather he will dish up for us this winter. The last 15 days or so, we have had from had to lovely sunny days, all samples of what can be dishied up when the weather man takes a notion.

We have enjoyed immensely those lovely bright sunny days which allow us to participate in the freedom of the great outdoors.

We had anticipated a full fledged winter by this time, but we are not kicking - are just taking advantage of the special privilege and enjoying the odd game of golf and tennis.

We cannot say that we enjoyed the dust storm last week, for they carry only brief either in small or large measures.

Highways are in fair condition, a little slippery, but otherwise in good condition.

"The Story of Its Finding and Position To-day"

By FRANK RUHN

Here are the pictures we should have given you last week to complete the story.

The incline here was terrific, and these expert miners pulled off an average 100 tons a day of material as classed as water, dropping it down through the side of the building and into waiting dump cars.

After this the belt carried the remainder to other crushers that reduced the metal to 3/4-inch diameter, then to ball crushers that made it into a paste, aided by plenty of water.

From here on it was water and chemicals that did the trick. The ore was first treated in vats with chemicals that bubbled the water and floated off the zinc. Then other treatments to float off the copper, and then finally the most of the balance was treated with cyanide for gold.

However, the copper concentrates as they were called when the water was drained off of them, went into other belts to storage bins from which they were drawn as needed by the smelters which never close down, night or day.

The waste was extracted from the concentrates by the electrolytic process which consists of floating them through wooden vats in which are suspended thin sheets of aluminum. Electric current causes the zinc to adhere to the aluminum on both sides, and at least 30 mm were at work steadily pulling up the sheets, stripping the zinc.

Behind the zinc department I noticed the building was open to the air on all sides and that everybody wore face masks. I asked one of the men, "I don't know why till I stepped in and then, now my breath caught, and how I coughed."

I didn't stay long, even with the protection of a handkerchief, but was told afterwards that the sensation was caused by particles in the dust, not dangerous to health but unpleasant, and I agreed with the latter statement though I worried.

The copper concentrates I followed to the top of the smelter which is just like a furnace eight stories high. You'll remember I said the ore contained sulphur, well, when I got to the top, what between heat and sulphur fumes, I almost fell down.

Aided by air driven in (oxygen and nitrogen) this sulphur, down the air burning of the rock. Yes, that's right. You can start a furnace with one paper and a little wood and lots of air and the ore catches fire and burns itself. On the way is a men's level there are big metal fingers suspended from bars and travelling along, gradually pushing it towards holes in the centre of the furnace, where it drops to the next level.

Here the men process except the bars push it towards holes on the side of the floor and so on to the bottom where, with much impurities out, the ore goes to the final crucible. But that's all that's left. The furnace is filled with powdered coal under high heat, so much ore, so much ash (as a flux) showers of sparks and more heat. Finally it's just right, the plug in the bottom of the furnace, the molten metal is drawn off in crucibles suspended from motor driven apparatus on rails near the ceiling, and moving over to pour into moulds.

The resultant bricks are shipped to Montreal, Que., where a final process takes out any gold or silver. A remoulding of the copper is made at which time it is practically 100% pure.

This is a quick and sketchy trip through a mine, a mill and a smelter, but it's quite a grind to do it on foot, and my leg muscles ached for three or four days from the steep climb.

An outstanding thing about ground also was the small amount of water required to do an immense amount of work.

Of course, water was being poured out all over the place. The boys you'd find seen controlling the machinery and everything else, they're the mine plant, smelters, foundry, etc. The machinery is really a marvel and almost human in perfection. An immense amount of water is used and everywhere they're either adding water or filtering it out as the machinery requires.

Finally when they've got all they need, they're sent to the water, driven by water again, through big wooden pipes, away in the distance a mile or so where it is gradually filling up an abandoned lake.

Making It Double

An undergraduate was hard up, so he wrote his father asking for a remittance of \$20. Knowing his father's tardiness at reply to this kind of a request, the young man added this during the "Remember to be home" which he gives quickly. His father wired him \$10.

A Worthy Objective

There may be a good many people in Western Canada who do not know the exact location of Kingville, Ontario, but there are very few who have not heard or read about, and some who have visited, the institution for which Kingville is famous—the bird sanctuary owned and operated by Jack Miner, the great friend of wild life and of children.

Even those who are only slightly familiar with the great work that is being done by Jack Miner to conserve bird life for the enjoyment of posterity and to promote love for and kindness to wild life among adults and children, will be more than glad to learn that efforts are being made, not only to preserve the sanctuary for all time to come, but to enlarge it and thus extend the scope of its usefulness by adding to the premises.

Fame Is Widespread

The fame of Jack Miner's bird sanctuary has extended far beyond the boundaries of Canada, even beyond the confines of this continent. His conservation plans for the benefit of future generations are almost as well known in Europe as in Canada and the United States, and only two years ago he was approached by officials of the Government of Czechoslovakia for information and advice, as a result of which that country to-day has a chain of sanctuaries for bird life patterned after the Jack Miner sanctuary at Kingville, Ontario. Indeed, his influence may be said to have spread around the world and his example is probably doing more to inspire conservation of bird life than that of any other man living.

Those who have visited the Miner sanctuary at Kingville know well enough the great human value of his work and it does not take much reflection to realize that it also has a material economic value. Tourists from all countries of the world are drawn to his door and none depart without carrying away from them pleasant recollections of scenes of beauty and lessons on conservation to serve a lifetime.

A Great Influence

A succinct summary of the value of the work of this pioneer bird hunter is contained in the following tribute paid by Arthur Jensen, Game Warden for Essex County, Ontario, in a recent broadcast:

"In my opinion Jack Miner, the Canadian naturalist, and his bird sanctuary at Kingville, Ontario, holds the same place in conservation as Mr. Henry Ford holds in the realm of industry. Jack Miner has been twenty years ahead. The sanctuary system of conservation and artificial feeding of bird life which he has preached from coast to coast for the last twenty-five years has been an example which hundreds of individuals have copied as well as State, Provincial and Federal governments, with the result that birds are alive to-day, yes, perhaps millions, through Jack Miner's influence both directly and indirectly."

What Jack Miner has done in the past quarter of the century to preserve many species of game birds for the benefit of sportsmen of the future generations, for the enjoyment of the lover of all that is beautiful in Nature and for the benefit of the tourist and industry dependent upon the tourist, cannot be calculated in dollars and cents. His work is a memorial which will endure through the ages and will be recorded in the pages of history, and the sanctuary itself is a memorial which should be preserved for the nation, for future generations, and as an attraction for visitors from other countries of the world.

Aid Is Required

Although some assistance has been rendered by governments to Jack Miner's enterprise, unfortunately the work has been carried on at a pecuniary loss and the operation of the sanctuary is encumbered by a deficit of \$10,000. He, himself, has passed the allotted three score years and there is no guarantee that the enterprise at Kingville will or can be carried on after his demise unless some public-spirited individual or organization makes its perpetuation a financial possibility.

It is reported that an endowment of approximately a million dollars is required to ensure this happy consummation, with an additional \$250,000 to provide for an extension of the present crowded facilities.

Would Ensure Perpetuity

An endowment to ensure the continuance of this work and the preservation of what amounts to an international museum would be more than a happy gesture for some such institution as the Rockefeller Foundation, which, according to a compilation in an article in a recent issue of Fortune magazine, has already expended some twenty-seven millions of dollars creating national parks on the other side of the Canada-U.S. boundary.

In the expenditure he has already made for similar objectives, Mr. John D. Rockefeller, Jr., has given evidence of his realization of the value of outdoor recreation for humanity and the endowment of such an institution as the Jack Miner bird sanctuary would not only constitute a fine gesture of international goodwill on his part or on the part of some other wealthy citizen of the United States, but would emphasize the international value of Mr. Miner's efforts for the whole of mankind.

Takes The Championship

Women may be changeable, but County Auditor Earl Miliken of Seattle, gives the mind-changeful championship to a prospective bridegroom. The youth asked him for money back on a marriage license. Told that was impossible, he asked whether he could use it for another girl. The answer again was no. "Aw nuts!" he exclaimed. "Guess I'll go back to the first girl."

Card playing can't be very wicked; there isn't a black heart in the deck.

Canadians Spend On Outside Goods: Own People Suffer

Canada gave financial or other assistance to 75 out of 10,000 Canadians in September, apart altogether from those who received aid from private charitable organizations in the Dominion yet, in the same month, Canadian imports from the United States alone exceeded \$44,000,000 and from the United Kingdom, nearly \$14,000,000.

This comparison was made in a statement issued by the National Producers in Canada Association for the purpose of "showing one way, at least, in which Canadians can, by insisting on buying Produced in Canada merchandise on every possible occasion, help to provide more work for their own people and thus decrease the amount paid out in relief, which comes from taxes.

"A study of official statistics issued by the Dominion government for the twelve month ending October, 1937, proves conclusively that Canadians are spending millions of dollars every week on necessities of

life which are imported when they could obtain, probably, the equivalent which are produced or made in this country by Canadians."

Among the classifications listed by the Association in this connection, after a careful study of the statistics, were such articles as furniture, silk and woolen goods, drugs, meats, handkerchiefs, hats, medicines, soups, fruits, vegetables, candy, sewing machines, fish, euleries, lamps, tobacco, sporting goods, hardware, tools, paints, type-writers, farm implements and fertilizers, wood, paper, books, machinery, dolls, jewellery, newspapers and periodicals.

"All these items were imported, in large or small quantities in the twelve months ending October, 1937, yet a study of our own production and manufacturing figures indicates that the value of these items are produced in Canada.

"While it is apparent that Canada cannot live unto herself alone, and imports are an important cog in the machinery of trade, Canadians can, by watching their purchases, exercise an important effect on the employment situation by insisting on all articles such as these which are produced or made in Canada if the price and quality are any where comparable with those of the imported articles."

Carmangay News

A demonstration was put on Tuesday afternoon by the Massey-Harris Co. of their new Twin Power tractor; a number of tractor fans handled the rubber tired machine round town. Talks and pictures were also given to a large gathering of farmers. H. S. Parker is the local agent.

Carmangay News

The Masons held a social evening to their friends Wed. night.

Wm. Honeyman very kindly officiated at the organ at the English church on Sunday morning.

O. L. Taylor is attending the Associated Grocers' meeting held in Calgary. Mrs. Taylor accompanied him.

The Ladies' Aid are sponsoring a concert to be held in the United church on January 20th. Lantern slides will also be shown.

The Plainfield Social Credit group will hold their regular meeting Friday, January 28th, at 8 p.m. The speakers will be Mrs. Root, Mr. Russell and Mr. MacFarlane. Ladies please bring lunch, everybody welcome.

On Friday evening last the Social Credit group held a card party at Barwash school, 500 was played. Lorne Roemmle carried off first prize, while Ralph Clark won second. Mrs. George Davies won first and Mrs. R. Clark won second. After which lunch was served.

There was a splendid attendance on Saturday at the Power Farming school put on by the International Co. Pictures of modern farm machinery and talks by some of the staff of the company explained their use. M. R. Leonard, the local agent, sponsored the event. Alf Wynn and Sid Thompson won on the draw for two prizes given away.

Twenty tables were in play at Norwegian whilst at the card party held in the Community hall Tuesday evening sponsored by the hospital auxiliary. The prizes were won by Mrs. Lars Brandvold, Mrs. Vilas Tasky and Mrs. J. Hobbs, the men's prizes going to Frank Lacro, Floyd Low tie with Bud Moore, who lost in the cut, and H. Kirkness. J. Hobbs, acted as chairman and D. H. Russell gave a short talk on the hospital.

CARMANGAY

Monday evening a girl's hockey team and a boy's team went to Vulcan to cross sticks with the teams there. The girls were the first on the ice, but were unable to score a goal against Vulcan's five. Very good hockey was displayed by the boys of both teams and were fairly evenly matched. Vulcan gained a lead of three goals in the first period. In the second the local boys made their first goal, their opponents scored another. It looked in the first period as if the game would be tied, for three more goals were shot by Carmangay, then Vulcan gained one more, making a final total of 6 to 4. The ice was keen. The Vulcan boy's and girls' teams will play a return game Saturday afternoon.

NOTICE

Notice is hereby given that a meeting of the water users of The Little Bow Irrigation District will be held at the residence of the Secretary, on the 20th day of January, 1938, at 8 o'clock in the afternoon, for the purpose of receiving the Auditor's report of the finances of the district up to the preceding thirty-first day of December, and for the purpose of receiving the report of the Chairman, Secretary and Treasurer and the Trustees of the District.

Take notice further, that immediately at the close of the meeting on the above date, an election will be held for a Trustee for place on the Board of Trustees. Nominations will be received by the secretary up to and including the 20th day of January, 1938. The nominations must be in the form prescribed by the Act and forms may be obtained from the secretary on request.

Dated at Carmangay this 14th day of January, 1938.

T. A. Middleton,
Secretary-treasurer.

HOW LONG CAN OIL INDUSTRY STAND UP.

The cumulative taxation on the oil industry, the most heavily taxed of all the great industries, has reached the stage where it has affected the ability of some units, particularly the independents, to expand their operations and to meet the increasing demand for petroleum products.

There is a tax, sometimes two or more, on every phase of their business, on what they sell, and on everything they buy. What they buy costs more because of increased taxation on businesses which supply the oil industry.

As an example take the case of Texas. Instead of oil being taxed 22 percent of its sale value, as popularly supposed, the average barrel of oil produced in the state carries a direct tax load of 8.5 cents. In 45 counties the average state and county tax is 10.9 cents and in 20 counties it ranges from 11 to 14.7 cents a barrel. This is because of the system of multiple taxes levied by the state, counties, school districts, and other subdivisions. More than a dozen different kinds of taxes are levied on the production of oil.

Gasoline is being retailed in Texas today for the same price as 15 years ago when crude oil was \$2.50 a barrel. The producer is now getting 10 percent less for his crude but taxes out the difference.

The oil industry has carried the increased cost of labor, which was already shown above the average, greater outcry for material and supplies and the mounting multiplicity of taxes. This handicap cannot be carried indefinitely. Art. B-30.

Canada is the chief exporter of honey to the Scottish Market. The white clover honey reaches that market principally from Ontario and Quebec, and recently from Saskatchewan, whose honey won all prizes in both the clear and granulated groups in the Dominion Section of The Imperial Fruit Show at Birmingham, England, in 1937. The quality of all Canadian honey is reported high and finds a ready sale.

You'll be ahead with a CHEVROLET!

Buy it Now, and Put Yourself Ahead in Style and Savings
... in Winter-driving Safety and Dependability

TO check the exclusive features listed to the left is to know that Chevrolet leads because Chevrolet gives more for the money. To check the advantages of buying your new 1938 Chevrolet now, is to know why you see so many on the streets already. For example ... You can face bad weather conditions confidently—no starting troubles, no repair expense, no worry about weak, smooth tires. You'll enjoy the priceless safety of perfected Hydraulic Brakes, always equalized, quick-acting—the protection of an All-Steel Body by Fisher, and Safety glass all around you. And don't forget you'll be saving costly depreciation on your present car.

Chevrolet puts you ahead in everything ... In style, safety—in the little it costs you to buy and run!

—Standard—Master Special 5-Pass. Sedan with coach.

- Styling as different as it is beautiful, for this is a sporty-looking, better-looking Chevrolet.
- Smooth—powerful—positive ... the safe, self-energizing brakes for modern travel ... giving maximum protection.
- So safe—so comfortable —"the world's finest ride"—De Master De Luxe Models.
- Giving the most efficient combination of power, economy, dependability.
- Larger interiors—lighter, brighter colors—and Unit-steel construction with Safety glass for safety.
- Eliminating drafts, smoke, windshield clouding and assuring each passenger individually controlled ventilation.
- Easier, tip-toe—pressure clutch operation. Wear is greatly reduced. No lubrication required.
